

In this post, we will guide on how to install Official Samsung Galaxy J4 Prime SM-J415G Stock Rom and provide some instructions on how to apply it if your device is rooted. If you don't know about this method, we'll first explain what the benefit it is and why you should try it. Our old post helped many of you helped their Samsung Galaxy J4 Prime SM-J415G device to solve such as Bootloop problem, Random shutdown problem and Security Error problem. This post is the advanced tutorial applied to the official stock rom we released, we will first update the pre-requisite and then we'll start. Pre-requisite: 1. First you need to install Galaxy J4 Prime SM-J415G Stock Rom based on Android 9 Pie firmware version. We recommend you download this file: [Download J415G_DSM1_Stock_ROM_2.2_\(613318\)](#). It's a compressed file format (.zip) and you need to use Winrar or 7zip to extract it. 2. Then, you need to install Samsung Galaxy J4 Prime SM-J415G ADB and Fastboot drivers from here. Please note that this is unofficial driver from the manufacturer. We won't be able to provide any support on this driver. 3. Now download these USB drivers from here which includes Samsung Kies, Odin and USB Drivers. 4. Download this Recovery file for Samsung Galaxy J4 Prime SM-J415G: [Download Android 9 Pie Rom - J415G - DIRECTORY - j415g - j415g - android_9_pie_recovery_image_v1.2.tar.m5](#) 5. Download this Odin file: [Download Odin3 v3.13.1](#) for Windows, Linux and Mac OS X. 6. Install ADB and Fastboot from Kies/Odin/USB Drivers list above if you have not installed it already. 7. Enable USB debugging on your android phone from Settings > About Phone > tap 5 times the build number until you see the message 'You are now a developer'. 8. Download this root file here: [Download Rootfs for J415G_CPT_2.4_PIE_RECOVERY-TMB-SM415G-J415G-Rootfs](#).tar (MD5: 0d7e48aa70fe02e1f43a0de6f7b24b54) 9. Extract this root file and copy the file system partition of your device (ext4) and paste it to the 'system' folder of your root file. (Go to Menu > File > select LOAD ADVANCED START MENU). 10. Now turn off your phone and then connect it with PC via USB cable. 11. Now click on Start Button on Odin 3 exe file and wait until the process finishes. After a few seconds, a warning window will appear, so press 'START'.
